Patience
Persistence
Creativity
Tenacity
Empathy

RECENT PROJECTS

Campside
An app for users to plan camping adventures based on information about nearby campgrounds along a chosen route. Campside empowers users to make informed decisions about where to stay and organizes information in one convenient location.
MEAN Stack, Sass, Git, Active Access Campground API, Google Maps Javascript API

Slant
Created wireframes, developed, and deployed a bike review forum site in an effort to explore working with Ruby on Rails.
Ruby on Rails, CSS3, Git, AWS, Sketch

Roots Check In Tool
At the Tech Stars Give First Hackfest, my team and I utilized Agile methodologies to develop a MVP web app for Roots Elementary School. This tool helps teachers to "team teach" more effectively, improving communication across the team so that they can smoothly transfer tasks.
HTML5, CSS3, SCSS, jQuery, Git, Sketch

Keto Hero
As an ongoing side project, this nutrition calculator is designed for parents implementing a ketogenic diet for their child. UI and UX are big focal points of an effort to increase successful outcomes.
MongoDB, Express, Node, jQuery, HTML5, CSS3, Flexbox, Git, Affinity Designer

EDUCATION

Galvanize
Full Stack Web Development Immersion Program
(Javascript, MongoDB, Express, Angular, Node, and more!)

Front Range Community College
WebLab Front End Web Development Boot Camp
(Javascript, jQuery, CSS, User Interface Design, User Experience Design)

Art Institute of Colorado
BA Graphic Design

PROFESSIONAL EXPERIENCE

Ryan Bird Graphic Design
Freelance Graphic Design Services
Identity Design, Collateral Design, Promotional Materials, Annual Reports

Whole Foods Market
Healthy Eating Education Ambassador, Team Trainer, Leader Without a Title.
Process facilitation, recipe research, creation, modification, presentation, demonstration. Consumer education, research and interaction. Telling the story of food.
Nutritious and delicious food hacker with a passion for the process. Kale Yeah!
